Psychology Matters

PUBLIC WORKSHOP

WHAT EXACTLY IS ADHD?!

What is the clinical meaning of Attention Deficit Hyperactivity Disorder (ADHD)? Why is ADHD diagnosed so readily in young people? When is ADHD mis-diagnosed? When should depression, anxiety or social interaction problems be diagnosed instead? How is ADHD different in children, teenagers and adults? Are the brains of people with ADHD different? What does the latest scientific information suggest about effective ADHD diagnosis and treatment?

Our public workshop will address these important concerns. We will also review the latest tests for assessing ADHD (i.e., the Test of Everyday Attention for Children & Adults).

Please join us for our introductory workshop on this complex clinical disorder - as it affects children, adolescents & adults.

SPEAKER: Mark Tunbridge, Ph.D. & Associates

DATE: Wednesday Workshops

TIME: 6:30 – 8:00 pm

VENUE: Suite 112, 1st Floor
Heritage House
